ADULT PATHWAY

Adult Services

Some learners may have come to the end of their educational journey and their next step will be to continue to develop their social and independent living skills. There are many provisions within the borough that can support them with this.

To access these services/provisions the young people and their families will work closely with adult social services to ensure funding and the correct provision is provided. This process begins when the young person turns 18 and cannot be done any earlier. Families will need to contact adult social services on or shortly after their 18th birthday and request an assessment. The process involves adult social services visiting you at home to discuss the needs and level of support required for the young person and their family.

Once an assessment has been carried out families will be informed as to whether they qualify for this service and the number of social care hours the young person is entitled to. From here, people are able to visit the different provisions to ensure where they choose will meet their needs.

See the list below for some of the services on offer within the borough.
